

Vegetation Management

SAN ANSELMO TOWN COUNCIL

May 24, 2022

PG&E's Vegetation Management Programs

- Trim trees to meet or exceed state vegetation and fire safety standards.
- Cut down dead, diseased, or dying trees that pose a risk to powerlines.
- Evaluate the condition of trees that may need to be addressed if they are tall enough to strike powerlines or equipment.
- Trim or cut down trees and shrubs to increase defensible space or construct stronger, more resilient electric equipment.

State and Regulatory Requirements

PG&E is legally required to maintain minimum clearances and address and abate trees that pose a hazard to our electric powerlines and facilities according to the following regulations:

California Public Utilities Commission* (CPUC)

[General Order 95, Rule 35](#)

California Public Resources Code (PRC)

[Section 4292](#) [Section 4293](#)

**Under [Article XII](#) of the California Constitution, PG&E's vegetation management work is under the sole jurisdiction of the CPUC, which preempts local discretionary authority over public utility projects.*

Routine Vegetation Management Program

When This Work Occurs

- Once annually

Where This Work Occurs

- Along all primary electric distribution lines and equipment

What This Work Involves

- Trimming or cutting down dead, diseased, dying and defective trees that pose a threat to PG&E facilities
- Maintaining required minimum clearances of:
 - 1.5 feet in non-High Fire-Threat Districts
 - 4 feet, with recommended 12 feet minimum at time of prune in High Fire-Threat Districts

Drought and Tree Mortality Program

When This Work Occurs

- Once annually, six months after Routine Vegetation Management

Where This Work Occurs

- Along primary electric distribution lines and equipment in High Fire-Threat Districts

What This Work Involves

- An additional inspection to ensure clearance requirements
- Cutting down all dead, dying and diseased trees that pose a threat to PG&E facilities

How We're Engaging With Customers

It's important that our customers and communities are informed about our important vegetation management work. We are committed to informing customers before, during and after the work occurring in 2022. Here are a few ways we are keeping customers informed:

Pre-Inspection Door Hanger

Tree Work Complete Door Hanger

Pre-Inspection Postcard

Tree Work Postcard

Mailer

What We're Doing

We know how important trees are to you, your community and the environment. Trees are important to us too, and they are changing every day.

That is why PG&E is carefully and frequently reviewing all trees and shrubs near electric lines to ensure we are addressing those that pose a safety concern.

This work takes place across approximately 100,000 miles of overhead powerlines every year, with some locations inspected multiple times a year.

Together, we can reduce the risk of wildfires and power outages and keep you and your community safe.

What This Work Involves

- Pruning trees to meet or exceed important state vegetation and fire safety standards
- Cutting down dead, diseased, dying or defective trees
- Evaluating the condition of trees that may need to be addressed if they are tall enough to strike powerlines or equipment
- Pruning or cutting down trees and shrubs to increase defensible space or to construct stronger, more resilient electric equipment
- Additional safety work to address vegetation near electric equipment and gas lines

What You Can Expect

PG&E is committed to partnering with our customers and communities to share why this safety work is so important. If any safety work is planned for your property, you can expect phone calls, postcards and door hangers prior to work taking place.

You may see crews conducting:

- Inspection**
PG&E or contract inspectors will inspect trees or shrubs to identify any safety concerns.
- Tree Work**
Crews will be on your property following the inspection to complete any necessary work.
- Safety and Quality Checks**
Crews will perform follow-up inspections and ensure work meets required safety standards.

For questions about this work, call us at 1-877-295-4949 or email wildfiresafety@pgandee.com
